

LETTER OF RECOMMENDATION

21 January 2019

To whom it may concern,

RE: ENERGIZE ELECTRICAL SAFETY MANAGEMENT (EESM) – LETTER OF RECOMMENDATION

We would like to express our appreciation to EESM for their performance on the Eagle Farm Racecourse Electrical Upgrade Project. EESM acted in the role of Head Contractor for this project managing multiple sub-contractors throughout the duration of the project.

From the outset of the project at the Tendering phase EESM were thorough and pro-active with providing requested information in a timely manner and suggesting solutions to assist in meeting the project's budget and program ambitions. Most importantly, during the Construction Phase we found the EESM team extremely co-operative and reasonable to deal with in particular with challenges arising from Construction occurring on an old site with many unknowns and the site remaining active as a place of business, hosting private events and ongoing horse training.

As the Electrical Engineers and Project Managers of this project we were very happy with the quality of the Electrical installation and overall management of the Construction process carried out by EESM. Through consistent and open communication the project was delivered on time to the satisfaction of the project team and Brisbane Racing Club.

We wouldn't hesitate considering EESM for future projects.

Yours faithfully

Michael Bourke

Associate, Electrical Project Engineer
